

Cikarang Listrindo Establishes a United Disaster Alert Program for Labansari Village

Jakarta, 30 November 2022 - Labansari Village is a village in East Cikarang District, Bekasi Regency. The

location of Labansari Village is at the borderline between Bekasi Regency and Karawang Regency. Labansari Village is located between two major rivers, namely the Citarum and Cibee River. Due to its geographical, Labansari Village is a disaster-prone village, especially floods that occur every year.

Flooding in Labansari Village can reach up to 2.5 meters high and recede upto a week time. During flooding, road access to the village was cut-off, causing the residents isolated and creating difficulties for the evacuation

efforts and logistic assistance supplies.

With such situation, PT Cikarang Listrindo Tbk (IDX: POWR) (the “Company”) in collaboration with parties related to PUSKASI (Center for Disaster and Refugee Studies) Polteksos Bandung, BPBD (Regional Disaster Management Agency), TAGANA (Taruna Siaga Disaster), and Swatantra Wibawa Mukti created the United Disaster Alert Program (BEGANA). BEGANA is a community-based disaster management, aimed to strengthening the community preparedness regarding disaster hazards and risks, forming disaster preparedness networks, and optimizing potential and resources for disaster management. In particular, the BEGANA program involves and equips people of productive ages who care for the surrounding environment and are enthusiastic about natural disaster management.

The design of the BEGANA program has 3 integrated focuses namely disaster mitigation, environmental preservation, and socio-economic strengthening. The Disaster Mitigation is by forming a Disaster Preparedness Community Work Team (TKMSB), Environmental Preservation by forming a Garbage Bank, and Social-Economic Strengthening by forming an Ecovillage. The benefits of the BEGANA program are that it can minimize the socio-economic impact if a disaster occurs in the area while strengthens the disaster mitigation so that it can become a well-integrated Disaster Preparedness Area.

PRESS RELEASE

The Company is also partnering with the Sekolah Tinggi Teknologi Duta Bangsa (STTDB) in one of the unified

disaster preparedness program, creating a flood disaster early warning system in Labansari Village. This warning system is a water sensor system with Solar Power generation (PLTS) which will provide early warning through sirens and lights when water levels from the Citarum and Cibeet Rivers reach certain height. This collaboration is an ongoing activity with the Company's previous program, namely Disaster Response assistance to strengthen disaster mitigation in Labansari Village, which incidentally is a flood-prone area.

Through this program, the Company received a gold category award from the 2022 Indonesia Sustainable Development Goals Award (ISDA), for the Company's contribution to achieving SDGs 11 - Sustainable cities and settlements. Cikarang Listrindo hopes to be an inspiration for companies or other institutional parties or individuals to speak and support the realization of the Sustainable Development Goals (SDGs) in Indonesia, because the achievement of SDGs will happen with the awareness and contribution of all Indonesian people, no matter how small contribution can be made, it will have a big positive impact in the future.
