

PT Cikarang Listrindo Tbk Advances Sustainability Commitment with Two Green PROPER Awards

Jakarta, April 7, 2026 – PT Cikarang Listrindo Tbk (“the Company”) has once again earned two Green PROPER ratings from the Ministry of Environment, awarded to its Jababeka Combined Cycle Power Plant (PLTGU Jababeka) and Babelan Co-firing Steam Power Plant (PLTU Co-firing Babelan) for their environmental management performance in 2025. The Company has consistently achieved the Green PROPER rating since 2021 for PLTGU Jababeka and 2024 for PLTU Co-firing Babelan.

This achievement reflects the Company’s strong commitment to implementing sustainability practices that go beyond regulatory compliance, including various initiatives aligned with Environmental, Social, and Governance (ESG) principles.

The Corporate Performance Rating Program in Environmental Management (PROPER) is a national evaluation program organized by the Ministry of Environment to assess the environmental management performance of companies in Indonesia. In the 2025 assessment period, the program was participated in by more than 5,300 companies across various industrial sectors nationwide, with 282 companies successfully achieving Green and Gold ratings.

The Green PROPER rating is awarded to companies that not only comply with all environmental regulations but also exceed compliance standards (beyond compliance) through innovation and the implementation of sustainable environmental management practices. The Company’s achievement of the Green PROPER rating is the result of strong collaboration and dedication across all levels of the organization, along with support from stakeholders. It underscores the Company’s commitment to maintaining regulatory compliance while strengthening environmental management practices and fostering collaboration with communities surrounding its operational areas.

The Company continues to implement various sustainable community empowerment programs through four main pillars: socio-economic development, education, health, and environmental initiatives, carried out across its operational areas. In addition to promoting economic independence through business development and food security programs, the Company also enhances community resilience to disaster risks through community-based disaster mitigation initiatives.

These efforts represent the implementation of the beyond compliance principle under PROPER, where the Company not only fulfills environmental regulatory obligations but also creates sustainable social and environmental value for the community.

SIARAN PERS

Rani Maheswari, Corporate Secretary, stated: "The achievement of the Green PROPER rating serves as recognition of the Company's commitment to conducting operations responsibly toward the environment and society. Moving forward, we will continue to strengthen the implementation of sustainability principles through operational innovation, improved energy efficiency, and the development of more environmentally friendly energy sources."

As part of its commitment to good corporate governance and transparency to stakeholders, the Company consistently publishes its Annual Report and Sustainability Report each year. These reports outline various corporate achievements, including progress in ESG implementation, most recently disclosed on March 31, 2026.

In its 2025 Sustainability Report, the Company highlighted several achievements in sustainable energy development. Among these, the utilization of biomass as part of its energy transition strategy generated 205 GWh of clean energy, marking a 155.5% increase compared to 2024. Additionally, the Company expanded its Solar Power Plant (PLTS) capacity to 45.7 MWp (2024: 35.8 MWp), with electricity production reaching 46.3 GWh (2024: 32.0 GWh).

As a result, the Company's total renewable energy generation in 2025 reached 251.5 GWh, representing a 123.9% increase compared to 112.3 GWh in 2024. In line with its guiding principle of delivering "Light that Brings Goodness," PT Cikarang Listrindo Tbk remains committed to conducting operations that prioritize environmental and social responsibility, particularly for communities surrounding its operational areas.

This achievement serves as motivation for the Company to continue delivering reliable energy while contributing positively to the environment and society, supporting a more sustainable future for Indonesia.
